

LAC2010

1st international conference on landscape archaeology

CLUE

Research institute for the heritage and history
of the Cultural Landscape and Urban Environment

Institute for
Geo- and Bioarchaeology
vrije Universiteit amsterdam

VU Amsterdam, the Netherlands 26-28 january 2010

Landscape archaeology is the science of material traces of past peoples within the context of their interactions of the wider natural and social environment they inhabited. The mission of the congress is to have multiple sessions with papers that are as much complimentary to each other in terms of natural and cultural themes so that cultural and natural landscape archaeologists, as well as archaeologists, historical geographers, earth scientists and palaeoecologists can present and discuss

with each other. Themes of the conference are 1) How did landscapes change?, 2) Improving temporal, chronological and transformational frameworks, 3) Linking lowlands to mountainous areas, 4) Applying concepts of scale, 5) Exploring new directions in digital prospection and modelling techniques, and 6) How will landscape archaeology develop in the future?
